

## Reflection

Use for career days, college visits, field trips, job shadows.

Name: Danylo Lysychenko

Lab: Computer Programming

Date: 2/11/26

Activity: Visit from James Town Community College

Write 6-8 sentences answering the following questions. What did you find interesting? How has this helped you determine future career plans? How does this information change any plans you have for training/education or how to achieve your goals? What is the next step in your career plan?

There are a lot of different things other than just classes like the gym, swimming pool, internships opportunities and other good things. I might consider this because it's not too far and it's a lot cheaper than other options out there. I could go there and get an education there and plus the internships could make it easier for me to get a job. My next plan in my career plan is to finish High School and Technical School, and my next step is either going to JCC or going on a self-taught route while working a job. Both options are good, but one is a lot cheaper than the other, meanwhile the community college route would give more opportunities in the computer science field. Both options could work well if I am strategic with my time and resources to make the most of my time and opportunities.
