Initial Questions	Information Gathered	Career Planning
<i>In the space below, please write 3-4 questions that you would like answered today and which representative(s) you will ask.</i> (1) Do you offer scholarships? (2) What programs/classes do you offer? (3) What are some career opportunities? (4) What would be some programs that I can do to get ahead of the crowd?	<i>In complete sentences, please write the answers to your questions and reflect on what you learned during ATD.</i> (1) Yes, 100% unmet tuition costs. (2) Cybersecurity, AI and data science (3) Data scientist, Cyber Security, Ethical hacker (4) Getting involved and getting experience	<i>What careers interest you today and what is one path to get there? How does this career fit with your interests, abilities, aptitude, and goals?</i> Some careers I am interested in are Web Development, AI developer and Ethical hacking. One path I can use to get there is learning concepts one by one and every time I learn a concept I start making a project and keep adding to that project as I learn more concepts. Getting experience by building projects. AI developer constantly learns, and I like learning new things and improve over time. Also, I like problem solving and math so I think this field would fit my interests.
