

Field Trip Reflection I

Name: Danylo Lysychenko

Lab _____

Date: 10/10/25

Where did you go on the field trip and what was its purpose? Gannon University and the purpose of that tour was to see what the university offers.

What are three (3) things you found interesting about the field trip with respect to goals for your future?

- 1) There VR games development there maybe I could get into that if I am interested in the future.
- 2) There are tournaments for sports that could help you stay active and stay healthy.
- 3) I found very cool classes I could take to stand out from the crowd.

What are some careers you are exploring and how do they match your interests, abilities, and goals?
What is the job outlook and external factors that impact employment opportunities?

- 1) Data Scientist because I like programming problem solving, critical thinking and trying to pay attention to detail. This is the most likely job I would do and also this field is needed because AI is developing fast and pays well for that job.
- 2) Cyber Security field looks very cool to fix vulnerabilities in the system and pays well.

What actions will help you prepare for your postsecondary plans and ultimately help you achieve your career goals?

Making projects that make you stand out takes advantage of scholarships and community service hours to show that you are good with time management.
