

Reflection

Use for career days, college visits, field trips, job shadows.

Name: Danylo Lysychenko

Lab: Computer Programming

Date: 05/11/26

Activity: Trip to White Thorn Games

Write 6-8 sentences answering the following questions. What did you find interesting? How has this helped you determine future career plans? How does this information change any plans you have for training/education or how to achieve your goals? What is the next step in your career plan?

That AI existed even before ChatGPT became a big tech revolution. AI is used to calculate things in games. Another thing I found interesting is that some assets in games are calculated with math like with the Fibonacci sequence. It got me a better understanding of how the video game industry works and how they do some of the things in games. I might investigate game development just to try and see if I like the process of developing and delivering digital entertainment to people. My next step is to start trying things and see what I like and can do and see how I can make money off it.
